ABSTRACT

The editorial team of Acta IMEKO encourages authors to follow the instructions as described in this template file to produce their manuscript. The paper must be written in clear British English, and figures should be of high quality, readable without the need to zoom in on details or legends. The abstract should contain the essentials of the paper. Important items are the aim of the research, the basic method and the major achievement (also numerically, when applicable). The length of the abstract should not exceed 200 words.

Section: RESEARCH PAPER

Keywords: Journal; template; IMEKO; Microsoft Word (NOTE the semicolon as separator.)

Citation: Authors, Template for an Acta IMEKO paper, Acta IMEKO, vol. 13 (2024) no. 1, pp. 1-6. DOI: 10.21014/actaimeko.v13i1.1

Section Editor: Section Editor

1. INTRODUCTION

The introduction describes the background of the research, a short review of related research published in recent literature, together with the major claims setting the framework of the present publication. References should be related to the present publication, not just a list of papers merrily showing the authors' knowledge of the literature. This relation must be made explicit. The newly presented method is shortly introduced, as an alternative to previously published methods, with mention of the advantages aimed at.

To minimize editing by the editorial team, authors are asked to follow the styles that go with this template. The font size of the body text is 10 pt and the font type is Garamond. For the header of a section use the style named "Level1Title".

The introduction ends with an outline of the remainder of the paper, for instance as follows. In Section 2 we will discuss how the paper can be divided in sections and subsections, and an indication of the use of numbering and heading format is outlined. In the next two sections the use of illustrations and equations is described. In Section 5 methods for citing references are given. Finally, in the concluding section the major rules are summarized.

Please do NOT change the template. The metadata (citation, section editor and article dates) will be updated during the production phase.

Submission hints:

- During the paper submission to the journal's website please make sure that all (co-)authors are given and their order is the same as in the paper. Later changes cannot be made by submitters, only by journal editors.
- Please indicate the related track (for example, TC4 2023, TC4 Metroarchaeo 2023) in the comments to the editor. If there is no relation to a given TC track, type "General track".
- Please explain the novelty of the paper (what is the extension to a former paper) in the comments to the editor OR in a separate cover letter.

2. FIRST PAGE

The first page should have the title of the paper, the authors names (do not use initials for the first and last name), and the author affiliations.

Following should be an abstract and 3 to 5 keywords separated by a semicolon. The next 4 items (citation, editor, dates and copyright) are to be updated by the editor. The paper information section ends with reference to the funding (leave blank if not applicable) and the name and email address of the corresponding author.
